JOB SEARCH PORTAL

GROUP 4

SERAN PANDIYAN I P

CB.EN.U4CYS21069

Why do we need Job portal?

In this modern world we cannot visit many companies to seek jobs in a single day and conducting interviews can take a long period of time. To make it easy in this modern world we can conduct all the interviews online and make it simple.

What is a Job Search Portal ?

Job search portal is a kind of website which is used for interactions between people who seek a job and Companies who seek employees. People can post their resume on the website or search for the job related to their field on the website . Companies can post their vacancies based on their available job

roles and they can also search for people who are suitable for the jobs they have posted from the resumes of people.

USER ANALYSIS
